SHARP SERVICE MANUAL

S02S2LC-20C3U

LCD COLOR TELEVISION

MODEL LC-20C3U-S

In the interests of user-safety (Required by safety regulations in some countries) the set should be restored to its original condition and only parts identical to those specified should be used.

SHARP CORPORATION

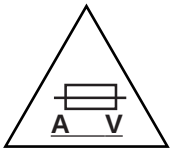
This document has been published to be used for after sales service only.
The contents are subject to change without notice.

IMPORTANT SERVICE SAFETY PRECAUTION

■ **Service work should be perfomed only by qualified service technicians who are thoroughly familiar with all safety checks and the servicing guidelines which follow:**

WARNING

1. For continued safety, no modification of any circuit should be attempted.
2. Disconnect AC power before servicing.



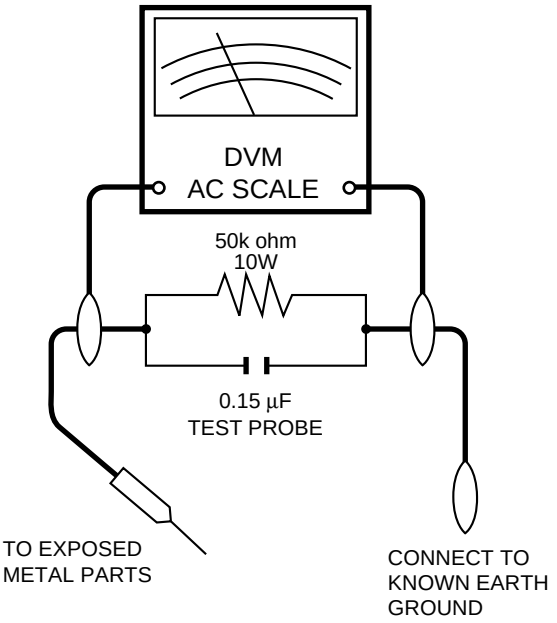
CAUTION: FOR CONTINUED PROTECTION AGAINST A RISK OF FIRE REPLACE ONLY WITH SAME TYPE F3701 (2.0A, 125V), F3702 (1.6A, 125V), F6700 (1.0A, 125V), F6701 (1.0A, 125V), F6702 (1.0A, 125V), F6703 (1.0A, 125V) AND F6704 (1.0A, 125V) FUSE.

BEFORE RETURNING THE RECEIVER (Fire & Shock Hazard)

Before returning the receiver to the user, perform the following safety checks:

1. Inspect all lead dress to make certain that leads are not pinched, and check that hardware is not lodged between the chassis and other metal parts in the receiver.
2. Inspect all protective devices such as non-metallic control knobs, insulation materials, cabinet backs, adjustment and compartment covers or shields, isolation resistor-capacitor networks, mechanical insulators, etc.
3. To be sure that no shock hazard exists, check for leakage current in the following manner.

- Plug the AC cord directly into a 110~240 volt AC outlet, and connect the DC power cable into the receiver's DC jack. (Do not use an isolation transformer for this test).
- Using two clip leads, connect a 50k ohm, 10 watt resistor paralleled by a 0.15µF capacitor in series with all exposed metal cabinet parts and a known earth ground, such as electrical conduit or electrical ground connected to an earth ground.
- Use an AC voltmeter having with 5000 ohm per volt, or higher, sensitivity or measure the AC voltage drop across the resisor.
- Connect the resistor connection to all exposed metal parts having a return to the chassis (antenna, metal cabinet, screw heads, knobs and control shafts, escutcheon, etc.) and measure the AC voltage drop across the resistor.
  All checks must be repeated with the AC cord plug connection reversed. (If necessary, a nonpolarized adaptor plug must be used only for the purpose of completing these checks.)
  Any reading of 0.75V peak (this corresponds to 0.5 milliamp. peak AC.) or more is excessive and indicates a potential shock hazard which must be corrected before returning the monitor to the owner.



SAFETY NOTICE

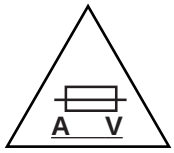
Many electrical and mechanical parts in LCD television have special safety-related characteristics.
These characteristics are often not evident from visual inspection, nor can protection afforded by them be necessarily increased by using replacement components rated for higher voltage, wattage, etc.
Replacement parts which have these special safety characteristics are identified in this manual; electrical components having such features are identified by " ⚠ " and shaded areas in the ***Replacement Parts Lists*** and ***Schematic Diagrams***.
For continued protection, replacement parts must be identical to those used in the original circuit.
The use of a substitute replacement parts which do not have the same safety characteristics as the factory recommended replacement parts shown in this service manual, may create shock, fire or other hazards.

PRECAUTIONS A PRENDRE LORS DE LA REPARATION

■ Ne peut effectuer la réparation qu' un technicien spécialisé qui s'est parfaitement accoutumé à toute vérification de sécurité et aux conseils suivants.

AVERTISSEMENT

1. N'entreprendre aucune modification de tout circuit. C'est dangereux.
2. Débrancher le récepteur avant toute réparation.



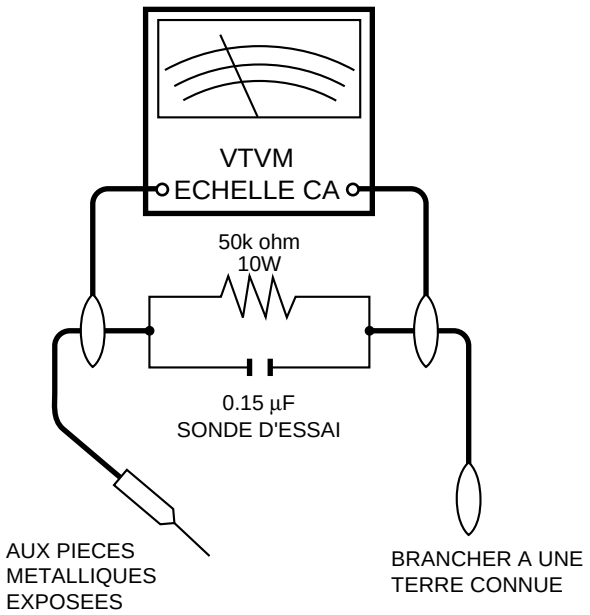
PRECAUTION: POUR LA PROTECTION CONTINUE CONTRE LES RISQUES D'INCENDIE, REMPLACER LE FUSIBLE PAR UN FUSIBLE DE MEME TYPE F3701 (2.0A, 125V), F3702 (1.6A, 125V), F6700(1.0A, 125V), F6701(1.0A, 125V), F6702(1.0A, 125V), F6703(1.0A, 125V), F6704(1.0A, 125V).

VERIFICATIONS CONTRE L'INCEN-DIE ET LE CHOC ELECTRIQUE

Avant de rendre le récepteur à l'utilisateur, effectuer les vérifications suivantes.

1. Inspecter tous les faisceaux de câbles pour s'assurer que les fils ne soient pas pincés ou qu'un outil ne soit pas placé entre le châssis et les autres pièces métalliques du récepteur.
2. Inspecter tous les dispositifs de protection comme les boutons de commande non-métalliques, les isolants, le dos du coffret, les couvercles ou blindages de réglage et de compartiment, les réseaux de résistance-capacité, les isolateurs mécaniques, etc.
3. S'assurer qu'il n'y ait pas de danger d'électrocution en vérifiant la fuite de courant, de la facon suivante:

- Brancher le cordon d'alimentation directem-ent à une prise de courant de 110-240V. (Ne pas utiliser de transformateur d'isolation pour cet essai).
- A l'aide de deux fils à pinces, brancher une résistance de 50 kΩ 10 watts en parallèle avec un condensateur de 0,15µF en série avec toutes les pièces métalliques exposées du coffret et une terre connue comme une conduite électrique ou une prise de terre branchée à la terre.
- Utiliser un voltmètre CA d'une sensibilité d'au moins 5000Ω/V pour mesurer la chute de tension en travers de la résistance.
- Toucher avec la sonde d'essai les pièces métalliques exposées qui présentent une voie de retour au châssis (antenne, coffret métallique, tête des vis, arbres de commande et des boutons, écusson, etc.) et mesurer la chute de tension CA en-travers de la résistance. Toutes les vérifications doivent être refaites après avoir inversé la fiche du cordon d'alimentation. (Si nécessaire, une prise d'adpatation non polarisée peut être utilisée dans le but de terminer ces vérifications.)
  Tous les courants mesurés ne doivent pas dépasser 0,5 mA.
  Dans le cas contraire, il y a une possibilité de choc électrique qui doit être supprimée avant de rendre le récepteur au client.



AVIS POUR LA SECURITE

De nombreuses pièces, électriques et mécaniques, dans les téléviseurs présentent des caractéristiques spéciales relatives à la sécurité, qui ne sont souvent pas évidentes à vue. Le degré de protection ne peut pas être nécessairement augmentée en utilisant des pièces de remplacement étalonnées pour haute tension, puissance, etc.
Les pièces de remplacement qui présentent ces caractéristiques sont identifiées dans ce manuel; les pièces électriques qui présentent ces particularités sont identifiées par la marque " ⚠ " et hachurées dans la liste des pièces de remplacement et les diagrammes schématiques.
Pour assurer la protection, ces pièces doivent être identiques à celles utilisées dans le circuit d'origine. L'utilisation de pièces qui n'ont pas les mêmes caractéristiques que les pièces recommandées par l'usine, indiquées dans ce manuel, peut provoquer des électrocutions, incendies, radiations X ou autres accidents.

Precautions for using lead-free solder

1 Employing lead-free solder

"All PWBs" of this model employs lead-free solder. The LF symbol indicates lead-free solder, and is attached on the PWBs and service manuals. The alphabetical character following LF shows the type of lead-free solder.
Example:

Indicates lead-free solder of tin, silver and copper.

2 Using lead-free wire solder

When fixing the PWB soldered with the lead-free solder, apply lead-free wire solder. Repairing with conventional lead wire solder may cause damage or accident due to cracks.
As the melting point of lead-free solder (Sn-Ag-Cu) is higher than the lead wire solder by 40ºC, we recommend you to use a dedicated soldering bit, if you are not familiar with how to obtain lead-free wire solder or soldening bit, contact our service station or service ranch in your area.

3 Soldering

As the melting point of lead-free solder (Sn-Ag-Cu) is about 220°C which is higher than the conventional lead solder by 40°C, and as it has poor solder wettabillty, you may be apt to keep the soldering bit in contact with the PWB for extended period of time. However, Since the land may be peeled off or the maximum heat-resistance temperature of parts may be excoeded, remove the bit from the PWB as soon as you conurm the steady soldering condition.
Lead-free solder contains more tin, and the end of the soldering bit may be easily corroded. Make sure to tum on and off the power of the bit as required.
if a different type of solder stays on the tip of the soldering bit, it is alloyed with lead-free solder. Clean the bit after every use of it.
When the tip of the soldering bit is blackened during use, file it with steel wool or fine sandpaper.

Becareful when replacing parts with polarity indication on the PWB silk.

Lead-free wire solder for servicing

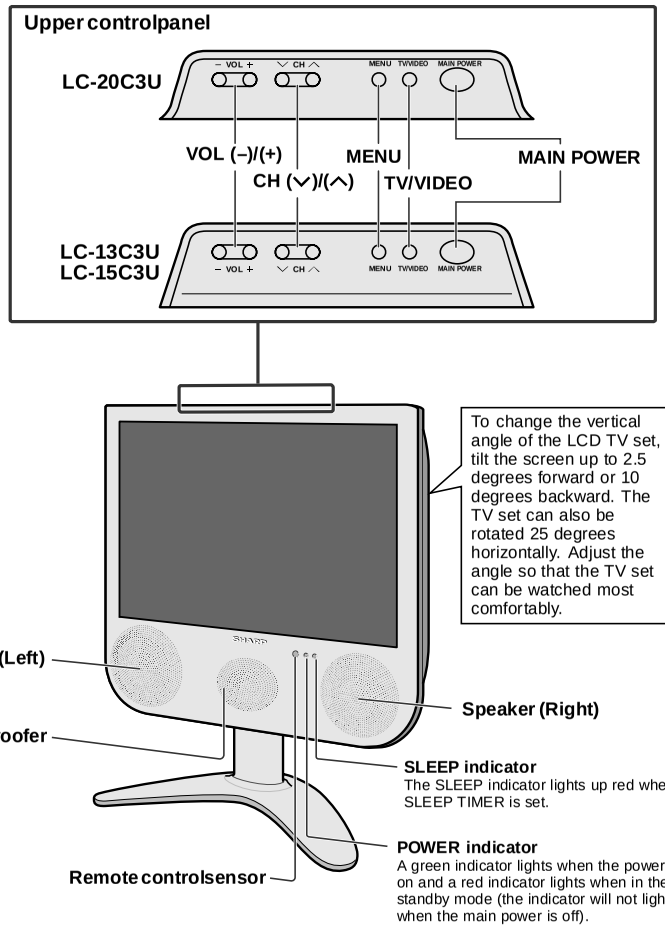
SPECIFICATIONS

Items / Model		LC-20C3U
LCD panel		19.7” Advanced Super View & BLACK TFT LCD
Number of dots		921,600 dots VGA
Video color systems		N358, N443, PAL, PAL-M, PAL-N, SECAM, PAL-60
TV function	Destination	USA/Latin America/Taiwan
	TV Standard (CCIR)	NTSC/PAL-M/PAL-N
	TV Tuning System	PLL 181 ch.
	STEREO	MTS+SAP
	CATV	125 ch.
Y/C FILTER		3D Y/C FILTER
Brightness		430 cd/m^2
Lamp life (Fluorescent lamp)		60,000 hours
Viewing angles		H: 170° V: 170°
Audio amplifier		2.5Wx 2 + 3.5W x 1
Speakers		ø2 in. (ø5 cm), 3 pcs.
Terminals	AV-IN1	AV-IN1, S-VIDEO-IN
	AV-IN2	AV-IN2/AV-OUT
	COMPONENT	COMPONENT-IN, AUDIO-IN
	Antenna	F-Type
	Headphone	Mini-jack for stereo (ø3.5 mm)
OSD language		English/French/Spanish
Power supply		DC 13V, AC 110-240V, 50/60Hz
Weight		19.8 lbs. (9.0 kg), w/o accessories
Accessories		Remote control, Batteries (x2), Antenna cable, AC adapter, AC cord, Cable clamps (x2), Operation manual

Specifications are subject to change without prior notice.

DISPLAY AND CONTROL OVERVIEW

Controls

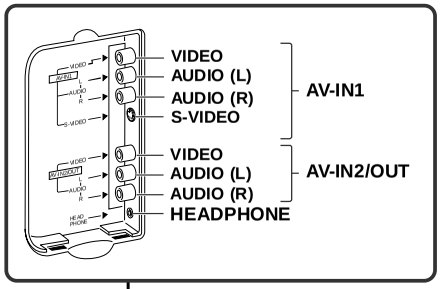


* The examples used throughout this manual are based on the LC-20C3U model.

NOTE

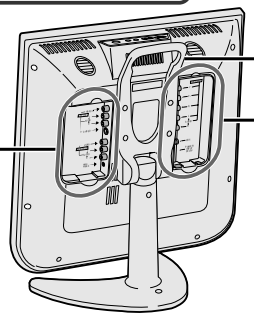
- **TV/VIDEO**, **CH (∨)/(∧)**, **VOL (–)/(+)**, and **MENU** on the main unit have the same functions as the same buttons on the remote control. Basically, this operation manual provides a description based on operation with the remote control.
- The LC-13C3U, LC-15C3U and LC-20C3U have different external dimensions and the positions where the names of the buttons are displayed also differ but the same operating procedures are followed for all three models.

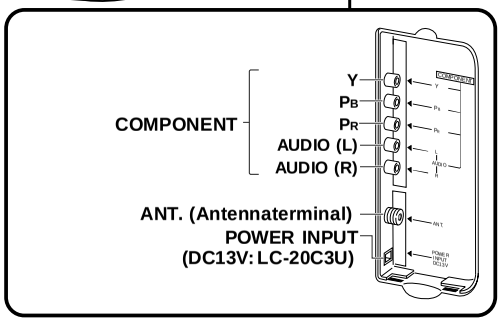
Terminals



● **Adjusting the screen view angle**

Hold the carrying handle and tilt the screen while steadying the stand with your other hand.

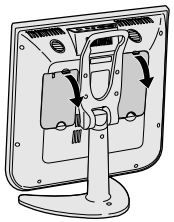




Removingthe Back Cover

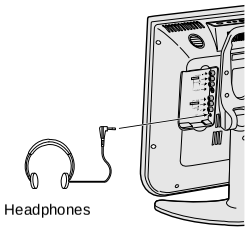
■ Before connecting cables and cords to the rear terminals, remove the back covers. Push in the tabs and pull out the back covers carefully.

■ To mount the cover, insert the 2 hooks on the bottom of the cover into the cabinet and press on the upper part of the back cover until the tab locks in place with a click.



ListeningwithHeadphones

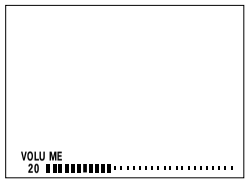
■ Plug the headphone mini-plug into the HEADPHONE jack located on the rear of the TV set.



Headphones

◀ Rear terminal

▼ On-screendisplay

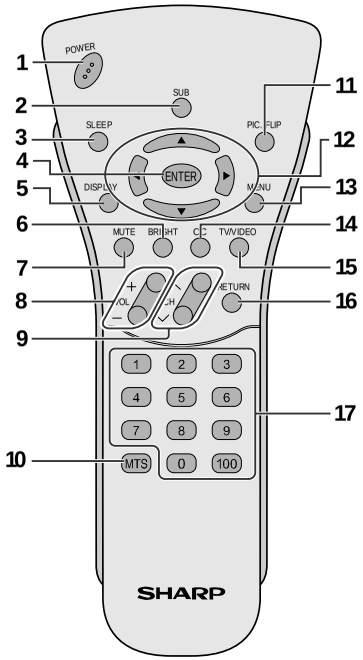


Adjust the sound volume using VOL (+)/(−) on the remote control.

NOTE

- Headphones are not included in the supplied accessories.
- No sound is heard from the main unit speakers when a headphone mini-plug is connected into the HEADPHONE jack.

REMOTE CONTROL



1 POWER
Switch the Liquid Crystal Television power on or off.

2 SUB
Switch the subwoofer on or off.

3 SLEEP
Set the sleep timer.

4 ENTER
Execute a command.

5 DISPLAY
Display the channel information.

6 BRIGHT
Adjust the brightness of the screen.

7 MUTE
Mute the sound.

8 VOL (+)/(–)
Set the volume.

9 CH (∧)/(∨)
Select channel.

10 MTS
Select audio settings.

11 PIC. FLIP
Set the orientation of the picture.

12 ▲/▼/◀/▶ (Cursor control)
Select a desired item on the screen.

13 MENU
Display the menu screen.

14 CC
Display Closed Caption subtitles.

15 TV/VIDEO
Select a Liquid Crystal Television input source.

16 RETURN
Return to the previous channel.

17 ChannelSelect
Set the channel.

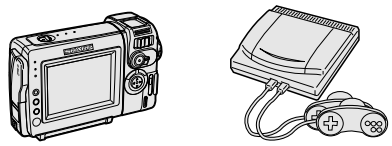
CONNECTING EXTERNAL DEVICES

You can enjoy picture and sound by connecting a VCR or a home video game system to the terminals located on the rear of the TV set.
When connecting an external device, turn off the power of the main unit first to prevent any possible damage.

Example of external devices that can be connected

To AV-IN1 terminal

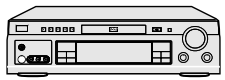
<Example>
- Camcorder
- Home video game system



* If your external device has an S-video terminal, S-VIDEO connection is recommended.

To COMPONENT terminal

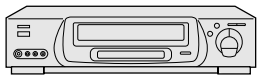
<Example>
- DVD Player, etc.

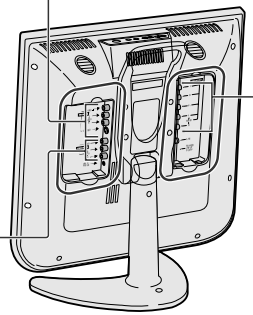


* If your external device has a component terminal, COMPONENT connection is recommended (you can view high-quality pictures).

To AV-IN2 terminal

<Example>
- VCR
- Laser disc player



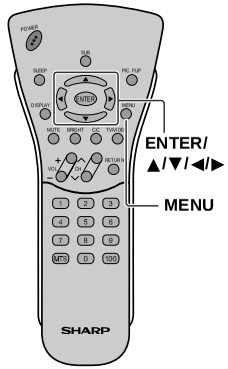


NOTE
- PC connection is not possible.
- For the cable, use a commercially available audio/video cable.
- Only connect audio/video signals to AV-IN1 and 2 terminals. Connecting other signals may result in a malfunction.
- AV-IN1 has 2 video input terminals: VIDEO and S-VIDEO. When you connect external devices to both terminals (and if you select AV-IN1), you can only view pictures from the S-VIDEO terminal. To view the picture from the VIDEO terminal, do not connect any external device to the S-VIDEO terminal.
- For more information about external device connections, see the manuals of your external devices.

SELECTING MENU ITEMS

Selecting Menu Items

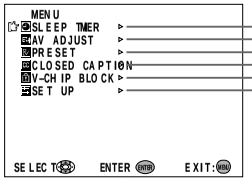
- This LCD TV set allows you to adjust the various settings using the menu screen. Select the desired menu item by following the steps below and then refer to the indicated page for details.

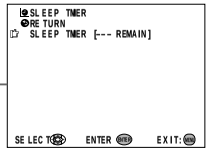


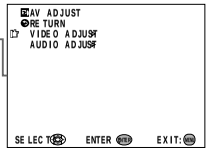
1 Press **MENU** to display the MENU screen.

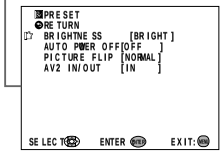
2 Press ▲/▼ to select the desired menu item, and press **ENTER**.

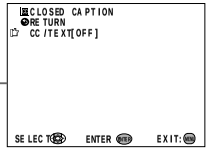
3 Press **MENU** to exit.

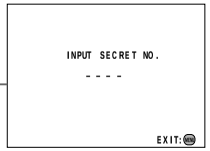


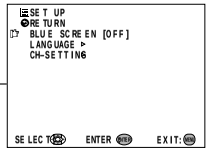










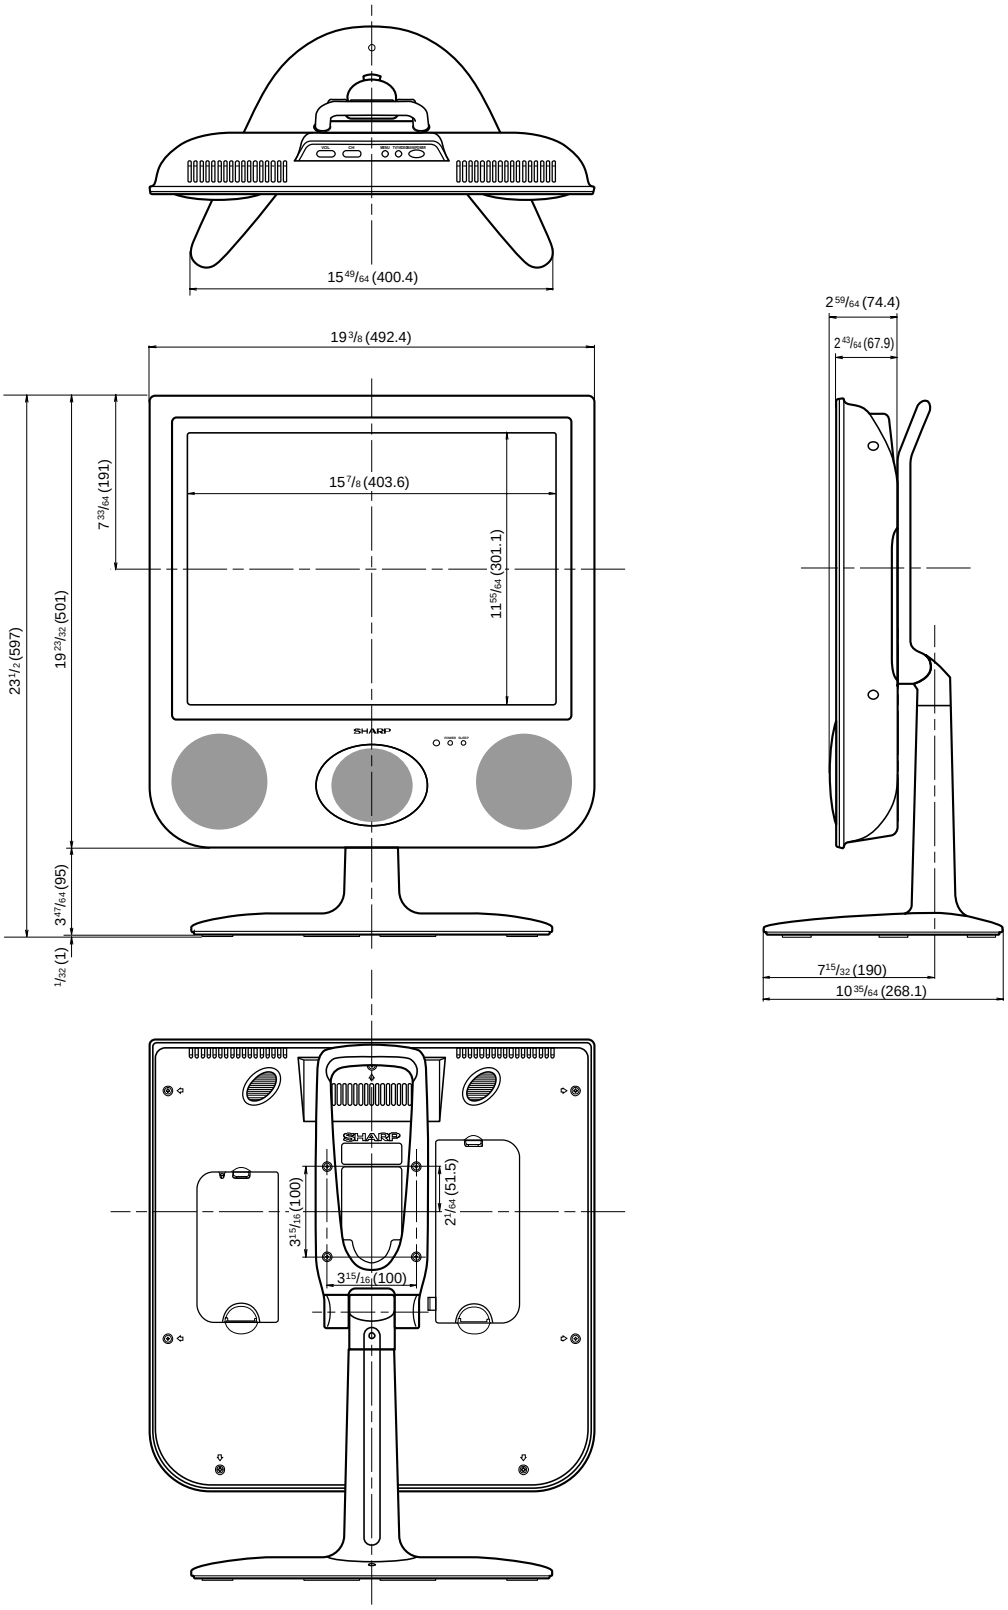


NOTE
- The displayed items differ depending on the setting conditions.
- The selected item changes to yellow.
- Items in magenta cannot be selected.
- TV mode
  This product is factory set to comply with the color system in the United States (NTSC-N358). For Brazil (PAL-M), Argentina (PAL-N) and Uruguay (PAL-N), set the color system before using this product.
- To return to the previous screen, select RETURN.
- You can adjust some settings with the special buttons: SLEEP, BRIGHT, PIC. FLIP, SUB and CC

* The characters in the diagram are made larger for easy reading.

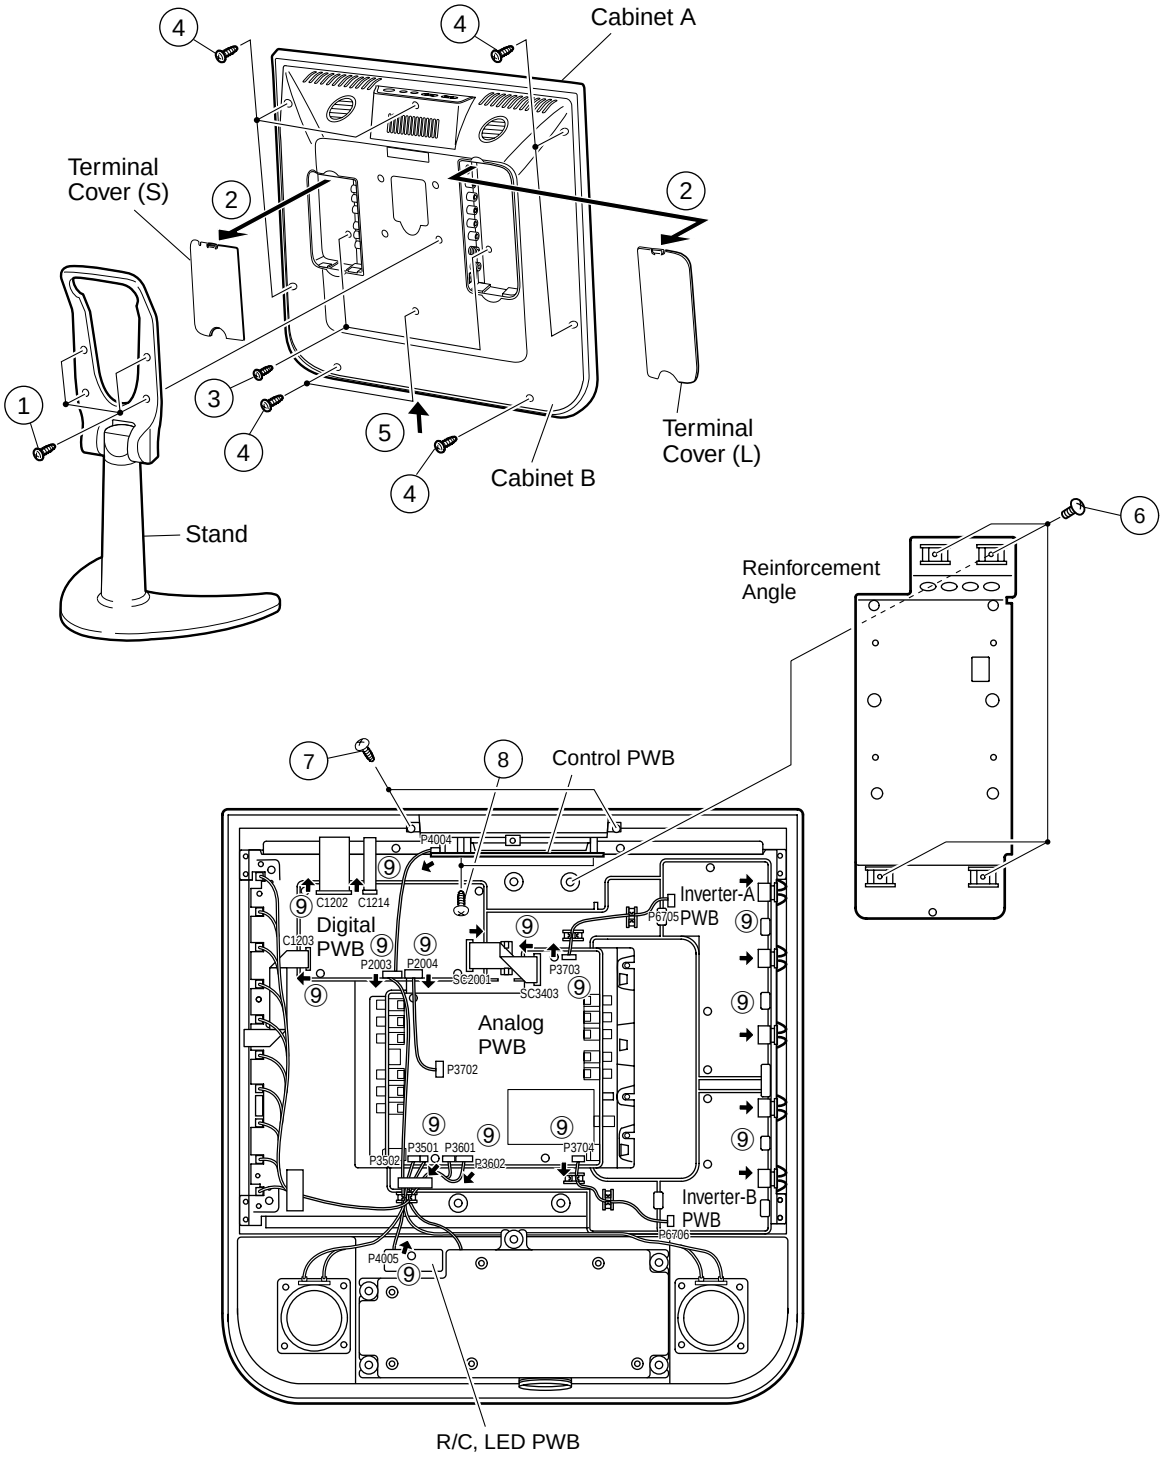
DIMENSIONS

Unit: inch/(mm)

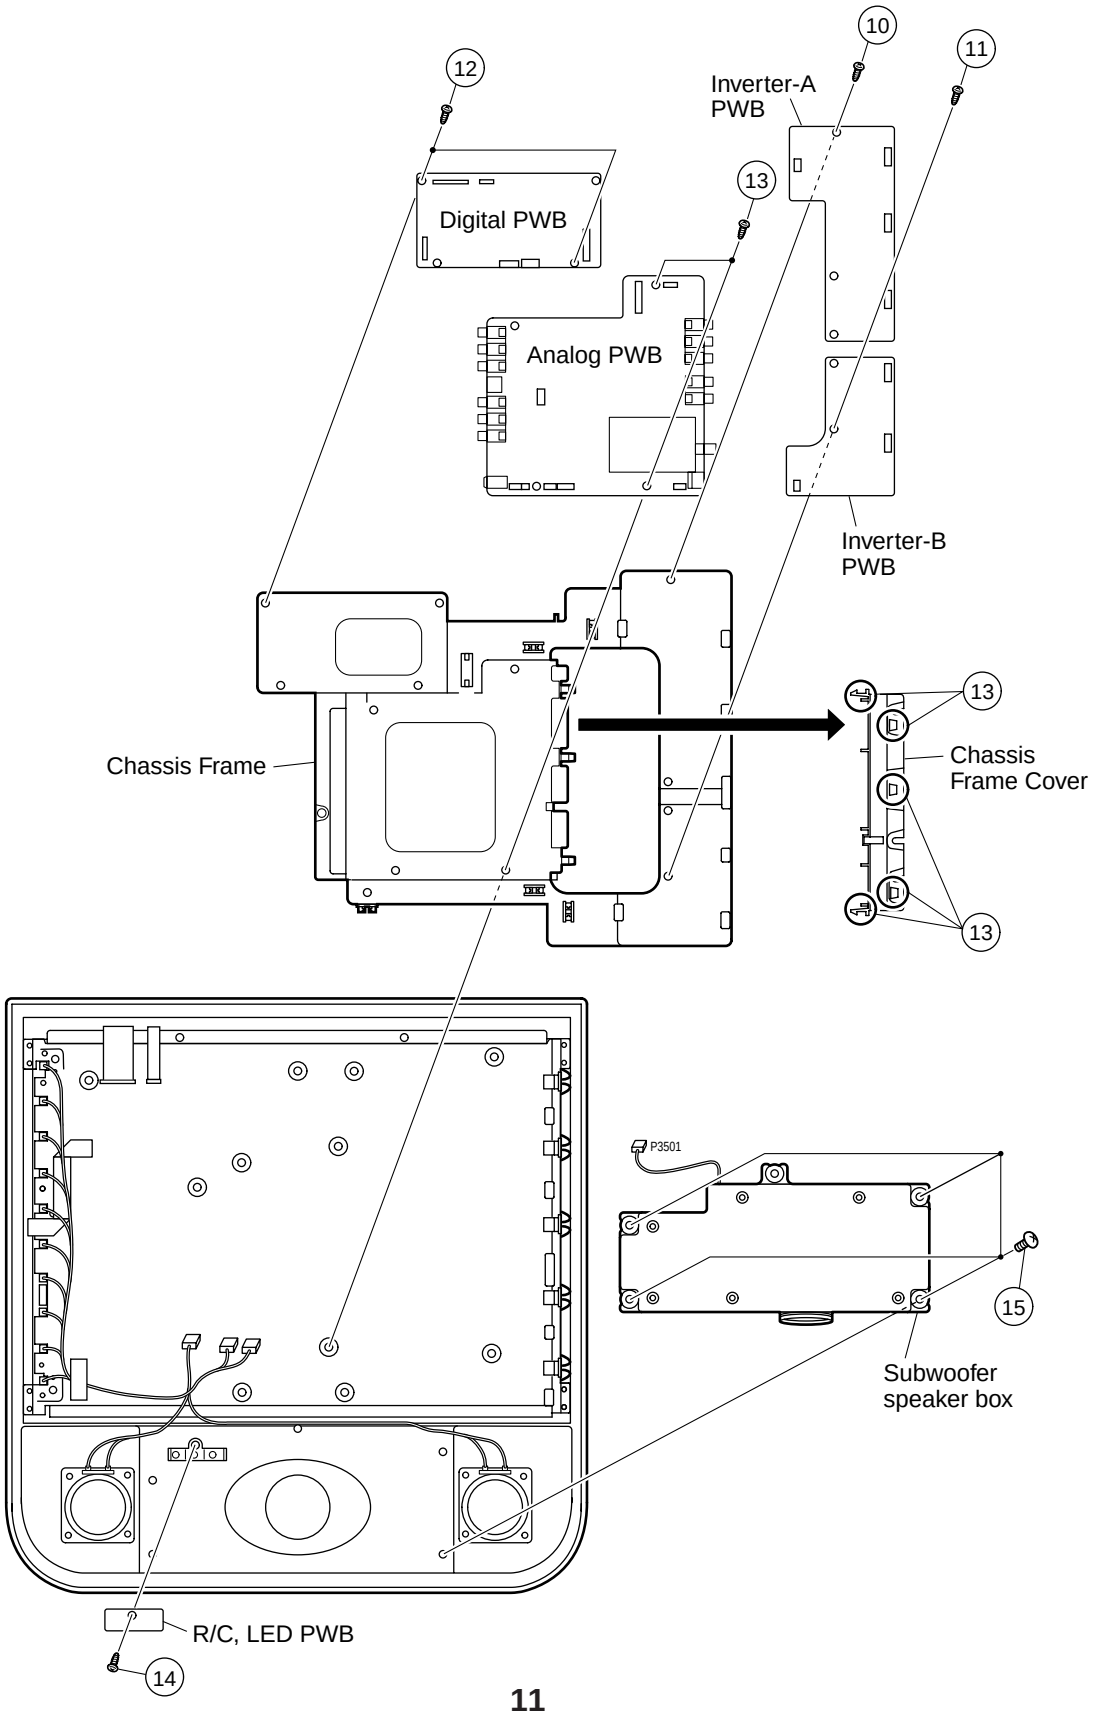


REMOVING OF MAJOR PARTS

1. Remove the table stand fixing screws (4 pcs.).
2. Remove the two terminal covers.
3. Remove the terminal section fixing screws (2 pcs.).
4. Remove the cabinet B fixing screws (8 pcs.).
5. Remove the cabinet B after opening from the direction of an arrow.
6. Remove the reinforcement angle fixing screws (4 pcs.).
7. Remove the top cover fixing screws (2 pcs.).
8. Remove the control PWB fixing screws (2 pcs.).
9. Detach the connector from each PWB.

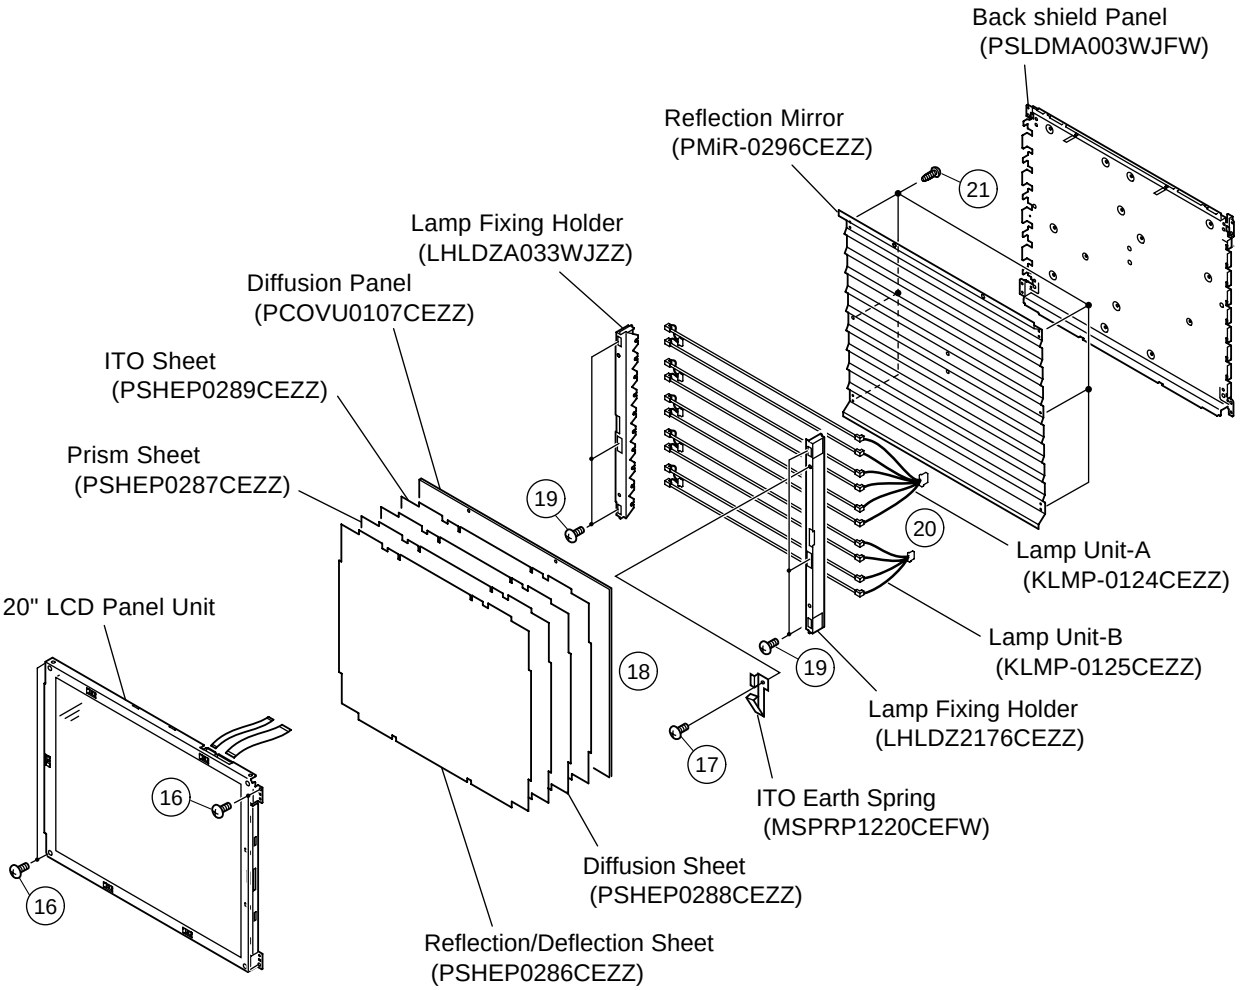


10. Remove the inverter-A PWB fixing screws (1 pc.).
11. Remove the inverter-B PWB fixing screws (1 pc.).
12. Remove the digital PWB fixing screws (2 pcs.).
13. Remove the analog PWB fixing screws (2 pcs.) and detatch the chassis frame cover fixing hooks.
14. Remove the R/C, LED PWB fixing screws (1 pc.).
15. Remove the Subwoofer speaker box fixing screws (4 pcs.).



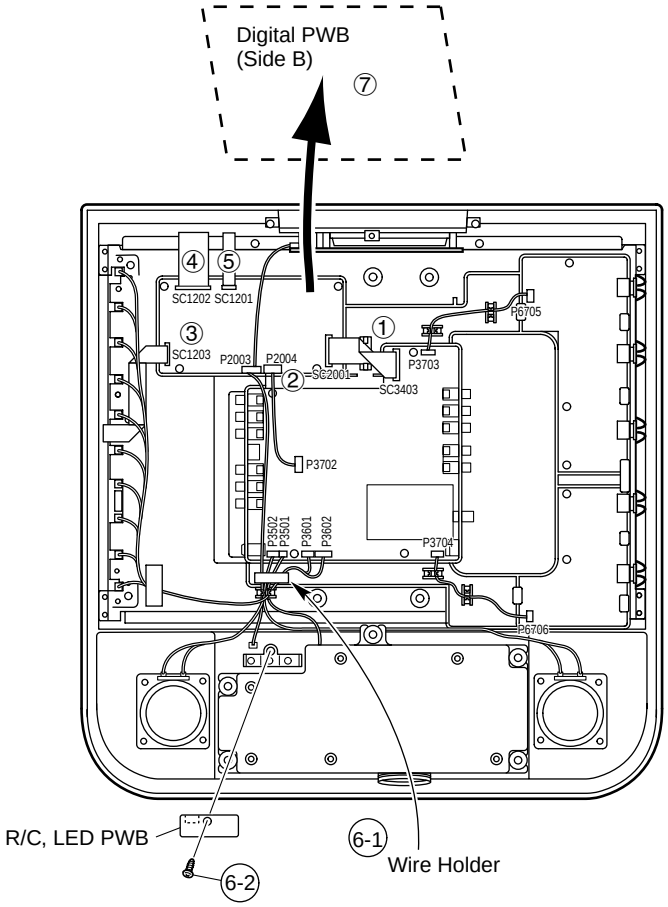
- Precautions in handling the LCD panels
  1. Work in a clean room (with humidities below 50%).
  2. Be sure to wear an anti-static armband.
  3. Handle the panels on an electroconductive mat.
  4. Be careful not to fall, shake and shock the panels.

16. Remove the LCD panel unit fixing screws (4 pcs.).
17. Remove the ITO earth spring fixing screw (1 pc.).
18. Remove the reflection/deflection, prism, diffusion, ITO sheets and diffusion panel.
19. Remove the lamp fixing holder fixing screws (6 pcs.).
20. Detach the lamp unit-A/B.
21. Remove the reflection mirror fixing screws. (6 pcs.).



Precautions at the time of the side B(back) service of Digital unit.

1. Remove only SC2001 of the FFC for connection between Digital unit(SC2001) and Analog unit(SC3403), and connect the extended cable (QCNW-A556WJZZ) for service.
2. Remove only P2004 of the Connecting Cord for connection between Digital unit(P2004) and Analog unit(P3702), and connect the extended cable (QCNW-A552WJZZ) for service.
3. Remove the FFC for connection between Digital unit(SC1203) and LCD panel unit, and connect the extended cable (QCNW-A553WJZZ) for service.
4. Remove the FFC for connection between Digital unit(SC1202) and LCD panel unit, and connect the extended cable (QCNW-A556WJZZ) for service.
5. Remove the FFC for connection between Digital unit(SC1201) and LCD panel unit, and connect the extended cable (QCNW-A555WJZZ) for service.
6. Remove the R/C, LED unit.
   6-1. Remove a lead from a wire holder.
   6-2. Remove the R/C, LED unit fixing screws(1 pc.).
7. Remove the Digital unit fixing screws(2 pcs.), a substrate is reversed.



Step	Part No.	Description
1	QCNW-A556WJZZ	Extention Cable 50-pin Digital (SC2001)-Analog (SC3403)
2	QCNW-A552WJZZ	Extention Cable 5-pin Digital (SC2004)-Analog (P3702)
3	QCNW-A553WJZZ	Extention Cable 30-pin Digital (SC1203)-LCD panel
4	QCNW-A556WJZZ	Extention Cable 50-pin Digital (SC1202)-LCD panel
5	QCNW-A555WJZZ	Extention Cable 20-pin Digital (SC1201)-LCD panel

ADJUSTING PROCEDURE OF EACH SECTION

The best adjustment is made before shipping. If any position deviation is found or after part replace is performed, adjust as follows.

1. Preparation for Adjustments

(1) Use the exclusive-use AC adapter or stable DC power supply.
AC adapter: UADP-0243CEPZ
DC power supply: 13 ± 0.5V (5.4A or more)

2. Special mode setting procedure

(1) After initialization of E^2PROM the mode is changed to the adjustment mode.
[Procedure]
Connect TP2001 and TP2002 to GND, and turn on the power.

[Description]
- The initialization of microprocessor is as follows.
- AV position, DAC data, G/A data, sound processor data, and video chroma data adjustment values are taken as defaults.

(2) Adjustment mode
[Procedure]
Short-circuit TP2001 to GND, and turn on the power.
Or short-circuit TP2002 to GND, and turn on the power.
Or holding down the [TV/VIDEO] key and [MENU] key, turn on the main power, and simultaneously press the (inspection process) [CH ▼] key and [VOL–] key to change the mode to the adjustment mode.

[Description]
The manual adjustment or adjustment through communication with the automatic machine is performed.

(3) Shipping setting mode
[Procedure]
Holding down the [TV/VIDEO] key and [MENU] key, turn on the main power, and simultaneously press the (inspection process) [CH ▲] key and [VOL+] key to change the mode to the shipping setting mode.
Note: Keep it in mind to turn off the power immediately. If any key-in is accidentally made, the setting will be canceled.

[Description]
User adjustment and other values are taken as defaults.
If TV is indicated as SETTING COMPLETE, setting has been completed.

3. Cancel of special mode

Turn off the main unit power.

4. Adjustments

	Adjustment	Adjusting conditions	Adjusting method
1	B+ Adjustment (R3760)	1. Connect the DC voltmeter to pin 2 of P3702.	1. Adjust the "B+ Adj" value to 5.0±0.02V with R3760. Make exact adjustment of the 5.00V level because it will be the reference for all the other supply voltages. Be sure to make this adjustment together with the main PWB (digital PWB). During the adjustment, be also careful not to allow the voltage at pin (2) of P3702 to go above 5.3 V.
2	Inch Size setup (If E^2PROM is replaced) (IC2004)	1. Go to the adjustment mode.	1. Select "INCH SIZE" and adjust to "20" with [VOL+] or [VOL-] key. * The color of "INCH SIZE" must be yellow.
3	Common-bias adjustment	1. Receive a B/W channel. 2. Go to the adjustment mode. 3. Select the "COM BIAS" with [MENU] key.	1. Adjust "COM BIAS" to the darkest screen with [VOL+] and [VOL-] key. * The color of "COM BIAS" must be yellow.
4	TAMP adjustment	1. Receive a half color bar signal in the TV mode so that the top left zone should turn white 75% as shown below. Other signal can be fed instead of the half color bar signal, however, if the point at the vertical 180th line and horizontal 46th pixel is of white 75%. (Make the adjustment based on the setting of this point.) 2. Adjust the “NTSC TAMP” setting on page 2 of adjustment process mode so that the “Y” reading on the same page should be BB - CA. 3. Make the same setting for the PAL-M TAMP and PAL-N TAMP data.	 Page 2 of adjustment process mode 2 ▶ COM BIAS 90 NTSCTAMP 20 PAL-M TAMP 20 PAL-N TAMP 20 RCUTOFF -1 GCUTOFF 0 BCUTOFF -1 G3 B3 R3 00 00 00 G1 B4 Y EF C7 C2 TAMP H CA TAMP L BB GAIBU VER0.000 “Y” data (white 75%)
5	White balance adjustment	1. Receive the monoscope pattern signal. 2. Adjust the “RCUTOFF” and “BCUTOFF” settings on page 2 of adjustment process mode to achieve an optimum white balance.	1. Do not change the “GCUTOFF” setting because otherwise the black level may fluctuate.

Test patterns in adjustment process mode

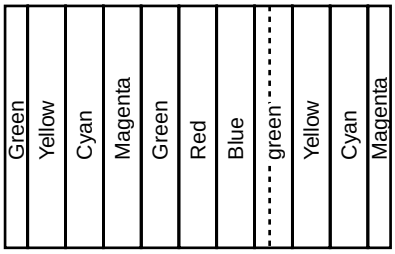
[1] IC801 (Video decoder) test patterns

1-1. Getting the test patterns displayed

Put the screen in AV1, AV2 or COMPONENT but keep out any signal. Call the adjustment process mode, select “TEST PATTERN” in the 3rd line of page 9, make the settings 1 thru 6, and the following test patterns show up.

1-2. Test patterns

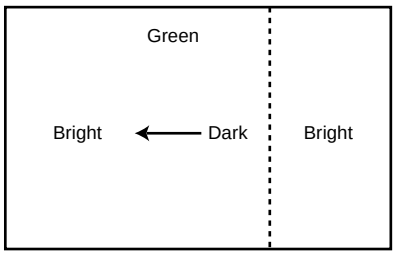
- Setting 1



The color bars are displayed as shown at left.

- Setting 2

  Finer vertical stripes than Setting 1 are displayed.
- Setting 3



The green pattern is displayed as shown at left.

- Setting 4

  A rather dark green-only pattern is displayed.
- Setting 5

  A half-tone green-only pattern is displayed.
- Setting 6

  A rather bright green-only pattern is displayed.

[2] IC1201 (LCD controller) test pattern

2-1. Getting the test pattern displayed

Put the screen in AV1, AV2 or COMPONENT but keep out any signal. Call the adjustment process mode, select “G/A TEST PATTERN” in the 13th line of page 18, turn on the setting, and the following test pattern shows up.

2-2. Test pattern

The following test pattern appears.

<table>
<tr><td></td><td colspan="4">Dark Gray scale Bright</td><td>Dark</td></tr>
<tr><td></td><td colspan="4">Dark Red Bright</td><td>Dark</td></tr>
<tr><td></td><td colspan="4">Dark Green Bright</td><td>Dark</td></tr>

PUBLIC MODE

1. Outline

   The Public mode is designed to limit the functions of LCD TV sets that are set up at hotels, public places (hospitals, for example), shop fronts and similar locations.

   Note:

   In the Public mode, some user settings may fail to be changed later. The Closed Caption, V-Chip, MTS and some other functions, as well as the volume control must be preset before getting the TV set into the Public mode.

2. Setting procedure

   Take the following steps to go to the Public mode.

   Call the adjustment process mode, and turn on [PUBLIC MODE]. (Getting started in the Public mode)

   On the Public mode setup screen, make necessary settings. (Making settings in the Public mode)

3. Getting started in the Public mode

   Hold down the [TV/VIDEO] and [MENU] buttons at once, and press the MAIN POWER switch to power on the TV set.

   Then press the [CH▼] and [VOL-] buttons at once to go to the adjustment process mode.

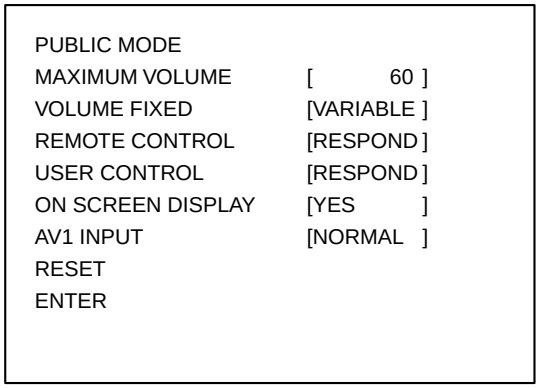
   Now press the [MENU] button and select [PUBLIC MODE]. Press the [VOL+] button to turn on the Public mode.

   And power off the TV set.

4. Making settings in the Public mode

   Before taking the steps below, make sure the TV set is in the Public mode (PUBLIC MODE on).

   Hold down the [VOL-] and [CH▼] buttons at once, and press the MAIN POWER switch to power on the TV set again. The PUBLIC MODE screen shows up.



Using the [CH▼] or [CH▲] button, select an item.

Using the [VOL-] or [VOL+] button, change the setting.

Note:

Finally be sure to select [ENTER] and press the [VOL-] or [VOL+] button to save the new setting.

Item	Default	Setting	Function
MAXIMUM VOLUME	60	1~60	Sets the highest sound volume level. (The volume level is expressed in digital form only.)
VOLUME FIXED	VARIABLE	VARIABLE	Makes the sound volume adjustable.
		FIXED	Keeps the sound volume fixed. (The sound volume is fixed at the then level. The Volume and Mute characters are not displayed onscreen.)
REMOTE CONTROL	RESPOND	RESPOND	Activates the remote controller.
		NO RESPOND	Deactivates the remote controller. (The buttons on the TV set are operative.)
USER CONTROL	RESPOND	RESPOND	Activates the buttons on the TV set.
		NO RESPOND	Deactivates the buttons on the TV set. (The remote controller alone is operative.)
ON SCREEN DISPLAY	YES	YES	Activates the onscreen display.
		NO	Deactivates the onscreen display.
AV1 INPUT	NORMAL	NORMAL	Usual operation.
		START	Enters the AV1 mode when powered on. (Switchable between TV and VIDEO)
		AV1 FIXED	Keeps the TV set fixed at the AV1 mode. (Unswitchable between TV and VIDEO)
RESET			Returns all the settings to their defaults.
ENTER			Saves new settings.

5. Quitting the Public mode

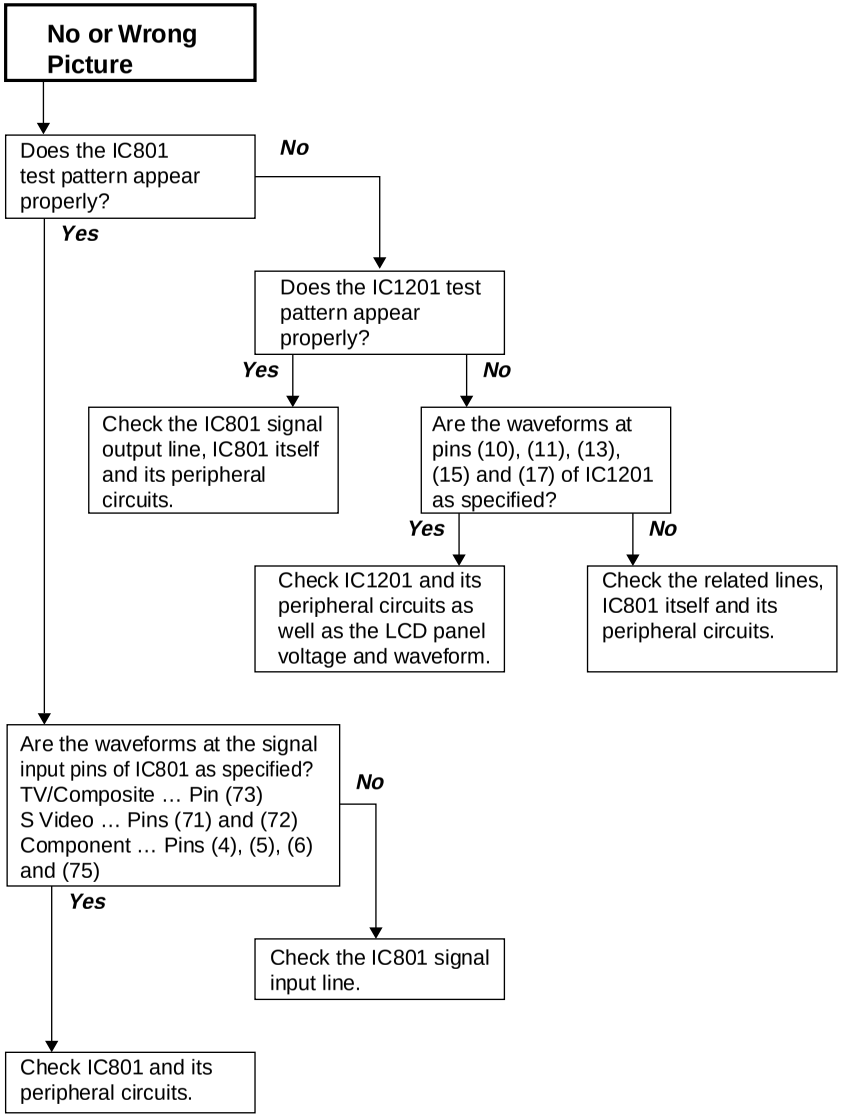
Hold down the [TV/VIDEO] and [MENU] buttons at once, and press the MAIN POWER switch to power on the TV set.

Then press the [CH▼] and [VOL-] buttons at once to go to the adjustment process mode.

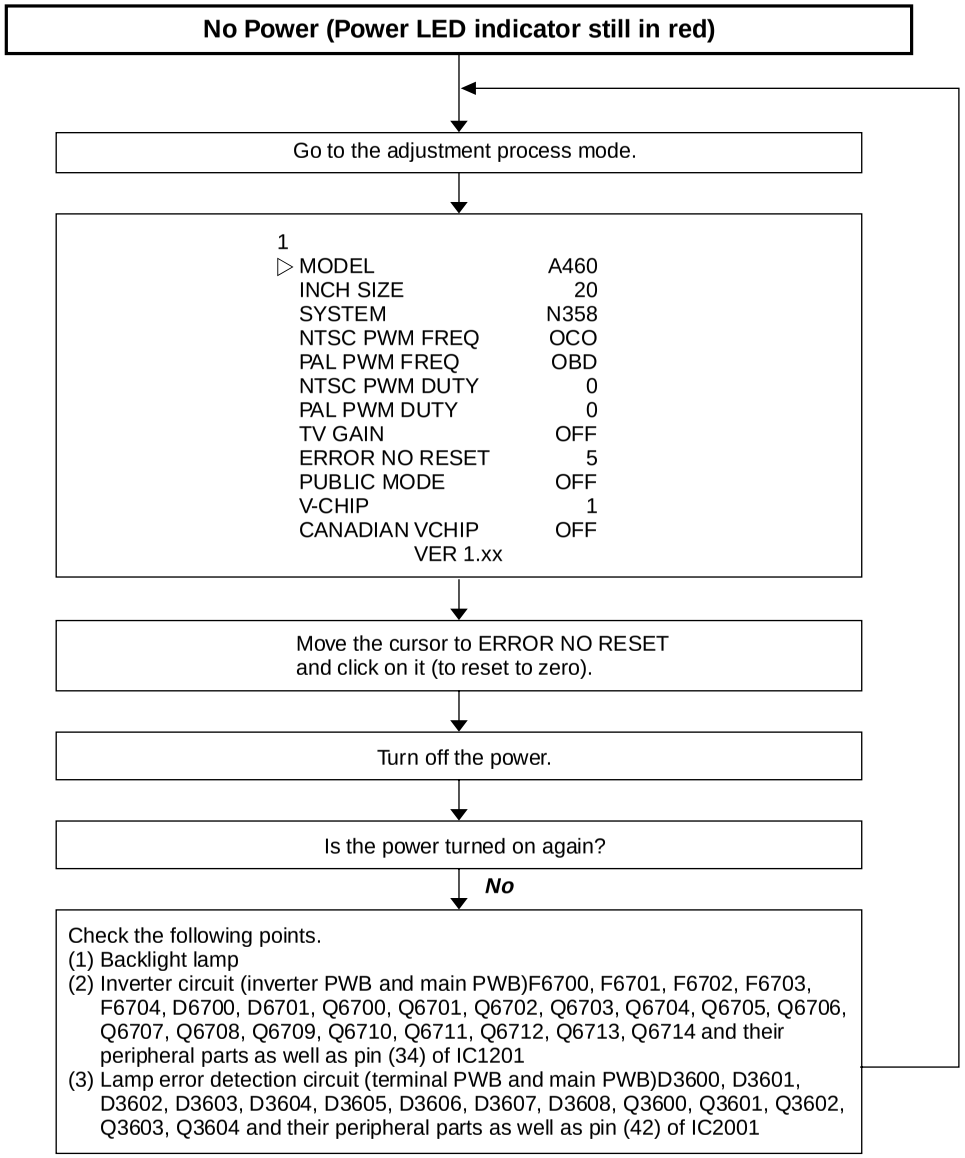
Now press the [MENU] button and select [PUBLIC MODE]. Press the [VOL+] button to turn off the Public mode.

Finally power off the TV set.

No or Wrong Picture



No Power (Power LED indicator still in red)



Note:

This model is equipped with the lamp error detection function that detects the current flowing into the fluorescent lamp and protects the backlight lamp drive circuit.

If a lamp error is detected, the microprocessor interrupts the unit and the ERROR NO RESET setting will go up.

When the ERROR NO RESET setting has reached "5", the microprocessor turns and keeps off the unit's power. To resume the power, take the above procedure to clear the ERROR NO RESET setting.

DESCRIPTION OF SCHEMATIC DIAGRAM

VOLTAGE MEASUREMENT CONDITION:

1. The voltages at test points are measured on exclusive AC adaptor and the stble supply voltage of AC 120V. Signals are fed by a color bar signal generator for servicing purpose and the above voltages are measured with a 20k ohm/V tester.

INDICATION OF RESISTOR & CAPACITOR:

RESISTOR

1. The unit of resistance "Ω" is omitted. (K=kΩ=1000 Ω, M=MΩ).
2. All resistors are ± 5%, unless otherwise noted. (J= ± 5%, F= ± 1%, D= ± 0.5%)
3. All resistors are 1/16W, unless otherwise noted.
4. All resistors are Carbon type, unless otherwise noted.

CAPACITOR

1. All capacitors are μF, unless otherwise noted. (P=pF=μμF).
2. All capacitors are 50V, unless otherwise noted.
3. All capacitors are Ceramic type, unless otherwise noted.
   - (ML): Mylar
   - (PF): Polypro Film
   - (TA): Tantalum
   - (ST): Styrol

CAUTION:
This circuit diagram is original one, therefore there may be a slight difference from yours.

IMPORTANT SAFETY NOTICE:
PARTS MARKED WITH "⚠" ( ) ARE IMPORTANT FOR MAINTAINING THE SAFETY OF THE SET. BE SURE TO REPLACE THESE PARTS WITH SPECIFIED ONES FOR MAINTAINING THE SAFETY AND PERFORMANCE OF THE SET.

AVIS DE SECURITE IMPORTANT:
LES PIECES MARQUEES "⚠" ( )SONT IMPORTANTES POUR MAINTENIR LA SECURITE DE L'APPAREIL.
NE REMPLACER CES PIEDES QUE PAR DES PIECES DONT LE NUMERO EST SPECIFIE POUR MAINTENIR LA SECURITE ET PROTEGER LE BON FONCTIONNEMENT DE L'APPAREIL.

PARTS LIST

PARTS REPLACEMENT

Replacement parts which have these special safety characteristics identified in this manual; electrical components having such features are identified by ⚠ and shaded areas in the Replacement Parts Lists and Schematic Diagrams. The use of a substitute replacement part which dose no have the same safety characteristic as the factory recommended replacement parts shown in this service manual may create shock, fire or other hazards.

"HOW TO ORDER REPLACEMENT PARTS"

To have your order filled promptly and correctly, please furnish the following informations.

1. MODEL NUMBER
2. REF. NO.
3. PART NO.
4. DESCRIPTION

in **USA**: Contact your nearest SHARP Parts Distributor to order. For location of SHARP Parts Distributor, Please call Toll-Free; 1-800-BE-SHARP

★ MARK: SPARE PARTS-DELIVERY SECTION

LISTE DES PIECES

CHANGE DES PIECES

Les pi`eces de rechange qui pr élelesentent ces caract éleristiques sp éleciales de s élecurit éle, sont identifi élees dans ce manuel : les pi`eces élelectriques qui pr élesentent ces particularit éles, sont rep éler élee par la marque ⚠ et sont hachur élees dans les listes de pi`eces et dans les diagrammes sch élematiques.
La substitution d'une pi`ece de rechange par une autre qui ne pr éLesente pas les m éoemes caract éLeristiques de s élecurit éle que la pi`ece recommand élee parl'usine et dans ce manuel de service, peut provoquer une éLelectrocution, un incendie ou toutautre sinistre.

"COMMENT COMMANDER LES PIECES DE RECHANGE"

Pour que votre commande soit rapidement et correctement remplie, veuillez fournir les renseignements suivants.

1. NUMERO DU MODELE
2. NO. DE REF
3. NO. DE PIECE
4. DESCRIPTION

in **CANADA**: Contact SHARP Electronics of Canada Limited Phone (416) 890-2100
